

So they need proof these are not solicited? I just got a junk fax on my home fax machine for setting up a flue clinic at my business site. I called the number, they said they got the information from Westfax in Colorado. Westfax said they got it from InfoUSA. InfoUSA won't say where they got it but I believe it is networksolutions or VEREIO (not Earthlink). And I know Earthlink and VERIO sold my email address because I got emails directed to my user name which was never a mailbox but the name to code my web pages.
